

## Agilent TriScroll 600

The TriScroll series is a range of two-stage dry scroll pumps that have high pumping speeds and low base pressure. TriScroll pumps eliminate the frequent maintenance requirements of oil-sealed rotary vane pumps, simplifying regulatory and environmental compliance, and eliminating oil disposal costs.

The unique, patented TriScroll pump offers proven reliability and durability, delivering consistent performance and superior cost of ownership.

- Two stage TriScroll design provides high pumping speeds and low ultimate pressure
- Long-life tip seals routinely last more than a year before replacement
- Bearing purge port maximizes bearing life in high water vapor applications
- Automatic air ballast manages water vapor without reducing pumping speed
